

**European Election Study 2014  
EES 2014 Voter Study,  
Second Post-Election Survey**

**Release Notes**

Sebastian Adrian Popa  
Hermann Schmitt

Original release 10 July 2015

MZES, University of Mannheim

### **Acknowledgement of the data**

Users of the data are kindly asked to acknowledge use of the data by always citing *both* the data and the accompanying release document.

How to cite this data:

How to cite this document:

Sebastian Adrian Popa, Hermann Schmitt, (2015) EES 2014 Voter Study, Second Post-Electoral Survey, Release Notes. Mannheim: MZES, University of Mannheim.

### **Acknowledgement of assistance**

The 2014 EES voter study was funded by a consortium of private foundations under the leadership of Volkswagen Foundation (the other partners are: Riksbankens Jubileumsfond, Stiftung Mercator, Fundação Calouste Gulbenkian). It profited enormously from the synergies that emerged from the co-operation with the post-election survey funded by the European Parliament. Last but certainly not least, it benefited from the generous support of TNS Opinion who did the fieldwork in all the 28 member countries.

The main aim of the **EES 2014 Voter Study, Second Post-Election Survey** is to partially remedy for the mistake that appeared in the question wording of qpp19 in the **EES 2014 Voter Study, First Post-Election Survey**. To be more specific in the **First Post-Election Survey** the original question wording of item qpp19 was changed from: “*And about where would you place the following parties on this scale? How about the (Party X)? Which number from 0 to 10, where 0 means “[European integration] already gone too far” and 10 means “[European integration] should be pushed further” best describes [Party X]?*” to “*And about where would you place the following political parties on this scale from 0 to 10, where '0' means the **political party** "has already gone too far[with European integration] " and '10' means it [European integration] "should be pushed further"?" What number on this scale best describes [Party X]?"*. Adding “**political party**” to the original question wording altered the meaning of the question making it impossible to accurately capture the perception of respondents regarding the placement of the parties on the pro-anti EU axis of political competition. Therefore both the original wording (qpp19a) and the modified question (qpp19b) wording were included in the **EES 2014 Voter Study, Second Post-Election Survey**. The original question wording (qpp19a) and the modified question wording (qpp19b) were both randomly assigned to 66% of the sample so that 33% of the entire sample answered both the original and modified question wordings. On the one hand, this design allows users to compute the “objective” party positions on the pro-anti EU continuum based on the original question wording present in the **EES 2014 Voter Study, Second Post-Election Survey** and subsequently integrate these “objective” party positions in the **EES 2014 Voter Study, First Post-Election Survey**. On the other hand, the presence of both the original and modified question wordings together with a number of other items tapping into both general political attitudes and specific attitude towards the EU, might potentially allow future users to establish a connection between the two versions of the question.

## **Structure of the data file**

### *Variable names*

The data file consists of four sets of variables distinguished by the characters **qp**, **qpp**, **d**, **p** and **w**.

The **p** variable describe the interview protocol: i.e. date of the interview, language on interview, region where interview took place, size of locality. The “**SPLIT**” item indicates if the respondent got the original, the modified of both **qpp19** items (i.e SPLIT group A received the original question wording, SPLIT group B received both the original and modified question wording, SPLIT group C received the modified question wording)

**qp** and **qpp** variables comprise the interview questions. Both variable order reflect that of the 2014 questionnaire. The numbering of the questions was altered so that it corresponds to the

**EES 2014 Voter Study, First Post-Election Survey**, the numbering of the item as reflected by the master questionnaire can be found in the label of the items.

**d** variables represent the socio-demographic variables provided by TNS-opinion. The variable order and numbering reflect that of the 2014 questionnaire.

**w** variables are additional variables, based either on additional information from the fieldwork agency, or derived on the basis of questionnaire variables. The weighting variables are based on standard weighting factors: gender x age, urbanization, region (Nuts).

### *Missing Values*

All **qp**, **qpp** and **d** variables follow an identical missing values labeling scheme.

-9: Don't Know [DK]

-8: Refused [REF]

-7: System missing

For the **qpp8** and **qpp14** batteries we added:

-99: Do not know the party

In addition, a number of variables (e.g., vote choice) have additional missing value labels within this range. Where relevant, consistent labeling has been implemented. Please note that **no** missing values have been defined in the Advance Release file, so it is up to the researcher to decide how to deal with various causes of missing data.

Where possible, the original question codes have been maintained as suffixes.

Missing values are not country specific.

The vote intention question is **qpp6**. Based on this variable we computed a new set of variables (**qpp6\_ees**) assigning unique values that correspond to the European Parliament Election Study 2009, Voter Study, in case the parties were not included in the 2009 study we assigned a new code. Additionally **qpp6\_emcs** was computed to reflect the coding system used by the Euromanifesto Project.

A special case forms the questions regarding the original placement of parties along the pro-anti EU continuum (**qpp19a\_** and **qpp19b\_**). For these variables, not the answer options, but the actual questions vary by country. For these three sets of questions, the specific party probed is described in these release notes (see below).

A list, containing party probed in both (**qpp19a\_** and **qpp19b\_**), as well as the corresponding party codes (used in the vote choice and party ID questions), is provided for the user's convenience (see below, Appendix 1: EES 2014 party codes and variables).

We encourage users of the data to contact us should they spot any errors or anomalies in the data via email at [Sebastian.Popa@mzes.uni-mannheim.de](mailto:Sebastian.Popa@mzes.uni-mannheim.de) (Sebastian Popa).

### **Variable Specific notes**

The following is a description of those variables where additional information may be required.

#### **Qpp6 Party Choice**

Question **qpp6** the answer options (parties) vary per country. Country specific codes have been recoded and now start with a country prefix (1+ISO) followed by a specific code per party, see variables **qpp6\_ees** and **qpp6\_emcs**. Labels for **qpp6\_ees** and **qpp6\_emcs**, **qpp5\_ees** are included in the integrated data file. See the bellow spreadsheet (i.e Appendix 1: EES 2014 party codes and variables) for the for the party names and codes used in these questions, as well as questions **qpp19a\_** and **qpp19b\_**.

#### **Qpp19a\_ pxx, qpp19b\_ pxx,**

**Qpp19a\_ pxx** (original question wording regarding the placement of the parties on the pro-anti EU continuum) and **qpp19b\_ pxx** (modified question wording regarding the placement of the parties on the pro-anti EU continuum): each questions probes one specific party. The party probed is documented bellow.

The suffixes (**\_ pxx**) are consistent for the two blocs of questions, and are identical to those used in the original language questionnaires

Note that order of the parties is fixed, and identical to that used in the original language questionnaire. The starting point of the rotation (first question asked) varies per respondent and question bloc.

#### Appendix 4, Weights

	Usage:
W.EX - Weight extrapolated	Recommended for any results
W.1 - Weight result from target	Results per country (except UK and Germany)
W.3 - Weight special Germany	Results for Germany
W.4 - Weight special United Kingdom	Results for UK
W.5 - Weight Euro 6	Results for EU6
W.6 - Weight Euro 9	Results for EU9
W.7 - Weight Euro 10	Results for EU10
W.8 - Weight Euro 12 - East Germany	Results for EU12 (without East Germany)
W.9 - Weight Euro 12	Results for EU12 (with East Germany)
W.10 - Weight Euro New 3	Results for FI + AT + SE
W.11 - Weight Euro 15	Results for EU15
W.13 - Weight NMS 10	Results for the 10 countries joining in 2004
W.14 - Weight Euro 25	Results for EU25
W.15 - Weight CC4	Results for HR + BG + RO + TR
W.16 - Weight Euro 29 (EU27 + TR + HR)	Results for EU27 + TR + HR
W.18 - Weight PA AC 2	Results for BG + RO
W.19 - Weight PC CC 2	Results for TR + HR
W.22 - Weight Euro 27	Results for EU27
W.23 - Weight Euro 28 (EU27 + HR)	Results for EU27 + HR
W.24 - Weight NMS 12	Results for the 10 countries joining in 2004 +the 2 joining in 2007
W.29 - Euro Zone 15	Results for the euro area countries (15 countries)
W.30 - No Euro Zone 15	Results for the non-area countries (15 countries)
W.81 - Weight Euro Zone 16	Results for the euro area countries (16 countries)
W.82 - No Euro Zone 16	Results for the non-area countries (16 countries)
W.85 - No Euro Zone MS	Results for the Member States that are not part of euro area
W.86 - No Euro Zone NMS	Results for the non-euro area countries that have joined the EU in 2004 and 2007
W.89 - Weight Euro Zone 17	Results for euro area countries (17 countries)
W.90 - No Euro Zone 17	Results for non-euro area countries (17 countries)
W.98 - Weight Euro Zone 18	Results for euro area countries (18 countries)
W.99 - Weight No Euro Zone 18	Results for the non-area countries (18 countries)
